EOS

**THE NEW
GENERATION
OF SAFETY
LIGHT
CURTAINS**

**TYPE 4
TYPE 2**

Type 4 and Type 2 Safety Light Curtains

Innovative Features

- Minimal cross section 28 x 30 mm
- No Dead Zone area on one side
- Minimal Dead Zone area on connector side
- Operating temperature range -10 to 55 °C
- Protection rate IP 65 and IP 67
- Start-up time ≤ 2 sec
- Models Master/Slave for cascade connection of two or three curtains

Type 4 and Type 2 Safety Light Curtains

Minimal cross section

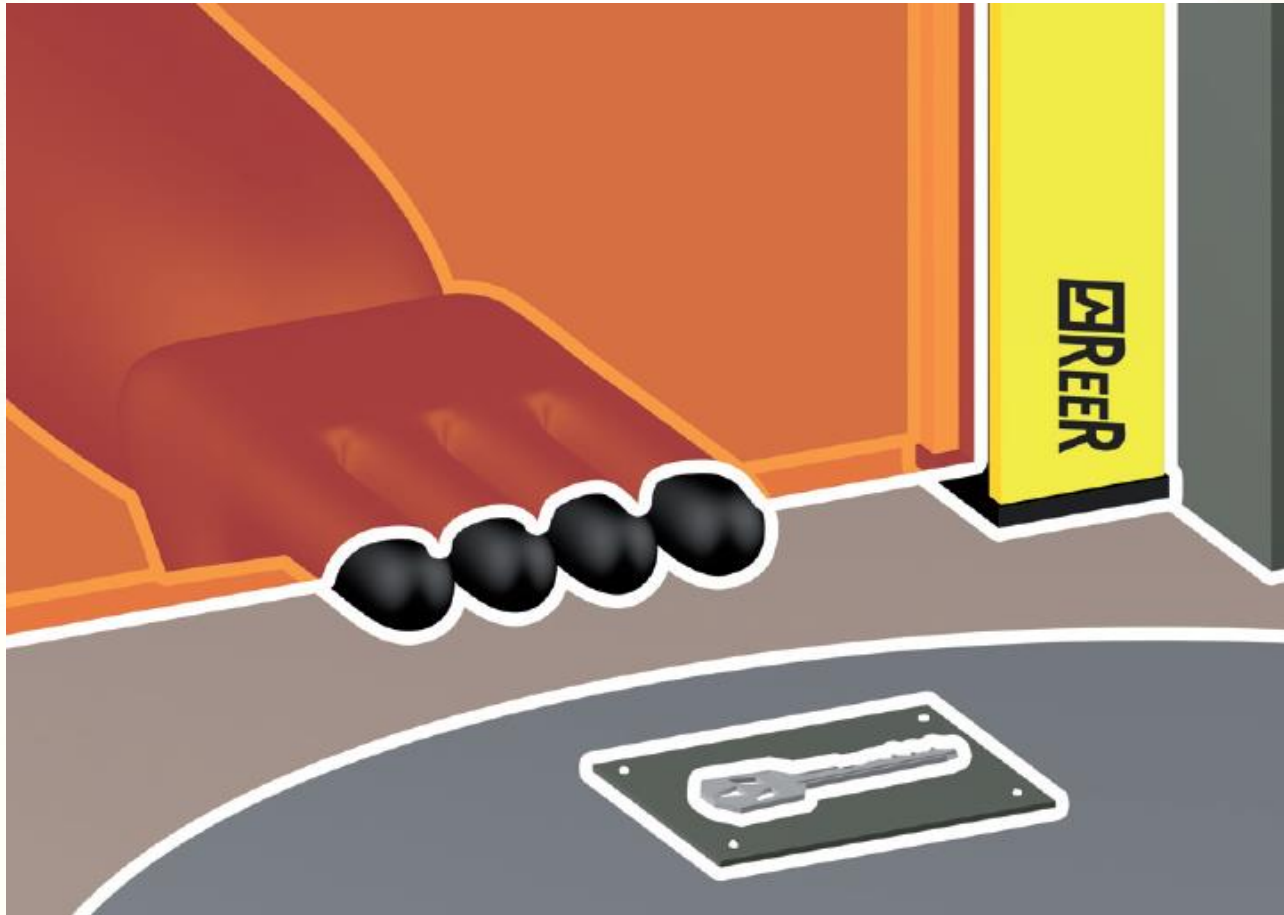

28 x 30 mm

EOS is one of the smallest light curtains on the market
(with all integrated safety functions)

Type 4 and Type 2 Safety Light Curtains

No Dead Zone area

The light curtain is applied on a work surface
The nominal resolution is always maintained
Fingers and hands are always detected and protected

Type 4 and Type 2 Safety Light Curtains

**2 L-mounted light curtains
maintain 40 mm resolution
(hand detection) in corner**
(models with resolution 30 and 40 mm)

Type 4 and Type 2 Safety Light Curtains

**OPERATING
TEMPERATURE RANGE**

-10° ÷ 55°

Type 4 and Type 2 Safety Light Curtains

PROTECTION RATE

IP 65 and IP 67

High resistance to infiltration of dust and liquids in a highly compact light curtain

The great majority of competitor's light curtains are only IP65

Please note that IP65 and IP67 are not in hierarchical order

Type 4 and Type 2 Safety Light Curtains

START-UP TIME

≤ 2 sec

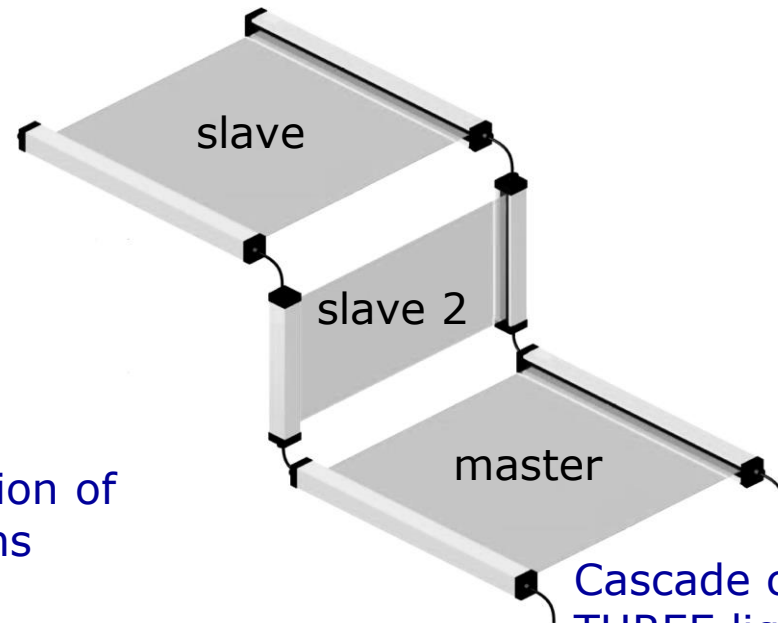

All functions quickly available

MASTER / SLAVE

Cascade connection of two or three light curtains

Cascade connection of
TWO light curtains

Cascade connection of
THREE light curtains

- Possibility of combining different resolutions and protected heights
- Connection cable between Master and Slave up to 50 m long
- No optical interferences between the light curtains

Type 4 and Type 2 Safety Light Curtains

MASTER / SLAVE

With three standard curtains it will be necessary to use and wire up 3 safety modules or 6 contactors.

Benefit:
with the master/slave solution with 3 series curtains it will be necessary to use and wire up only 1 safety module or 2 contactors.

Type 4 and Type 2 Safety Light Curtains

BACK T-SLOT FOR FASTENING
Robust and simple

Type 4 Safety Light Curtains

SAFETY LEVEL

- **Type 4** - IEC 61496-1-2
- **Category 4** - ISO/EN 13849-1
- **PL e** - ISO/EN 13849-1
- **SIL 3** - IEC 61508
- **SIL CL 3** - EN 62061

Safety level:

TYPE 4

SIL 3 – SILCL 3
PL e – Cat. 4

Type 4 Safety Light Curtains

- **7 types of detection:**
 - Resolution 14 for finger detection
 - Resolution 20, 30, 40 mm for hand detection
 - Resolution 50, 90 mm for detection of the body in a dangerous area
 - 2-3-4 beams for body detection
- **Protected height range 160 to 1510 mm**
- **Max range 6 m for EOS 14 mm A and X models**
- **Max range 12 m for EOS 20,30,40,50,90 and 2,3,4 beams A and X models**
- **Max range 20 m for EOS 20,30,40,50,90 and 2,3,4 beams AH and XH models**
- **Integrated selectable manual or automatic Start/Restart**
- **Feedback input for external relay monitoring (EDM)**
- **M12 5/8 poles connectors and unshielded cables up to 100 m**

Type 4 Safety Light Curtains

MODELS

- **EOS4...A** Automatic Start/Restart
2 x M12 -5 poles connectors
6 m max range for 14 mm
12 m max range for 20,30,40,50,90 mm and 2-3-4 beams
- **EOS4...AH** Automatic Start/Restart
2 x M12 -5 poles connectors
20 m max range for 20,30,40,50,90 mm and 2-3-4 beams
- **EOS4...X** Manual/automatic Start/Restart
Feedback input - EDM
2 x M12 connectors (1x5 poles + 1x8 poles)
6 m max range for 14 mm
12 m max range for 20,30,40,50,90 mm and 2-3-4 beams
- **EOS4...XH** Manual/automatic Start/Restart
Feedback input - EDM
2 x M12 connectors (1x5 poles + 1x8 poles)
20 m max range for 20,30,40,50,90 mm and 2-3-4 beams

Type 4 Safety Light Curtains

MODELS

- **EOS4...XM** Master Models
Manual/automatic Start/Restart
Feedback input - EDM
2 x M12 connectors (3x5 poles + 1x8 poles)
Manual/automatic Start/Restart
6 m max range for 14 mm
12 m max range for 20,30,40,50,90 mm and 2-3-4 beams
- **EOS4...XS** Slave Models
2 x M12 -5 poles connectors
(to be connected to Master models)
6 m max range for 14 mm
12 m max range for 20,30,40,50,90 mm and 2-3-4 beams
- **EOS4...XS2** Slave2 Models
2 x M12 -5 poles connectors
(to be connected between Master and Slave models)
6 m max range for 14 mm
12 m max range for 20,30,40,50,90 mm and 2-3-4 beams

Type 2 Safety Light Curtains

SAFETY LEVEL

- **Type 2** - IEC 61496-1-2
- **Category 2** - ISO/EN 13849-1
- **PL d** - ISO/EN 13849-1
- **SIL 2** - IEC 61508
- **SIL CL 2** - EN 62061

Safety level:

TYPE 2

SIL 2 – SILCL 2
PL d – Cat. 2

Type 2 Safety Light Curtains

Features

- **5 types of detection:**
 - Resolution 30 - 40 mm for hand detection
 - Resolution 50 - 90 mm for detection of the body in a dangerous area
 - 2-3-4 beams for body detection
- Protected height range 160 to 1510 mm
- Max range 12 m
- Integrated selectable manual or automatic Start/Restart
- Feedback input for external relay monitoring (EDM)
- M12 5/8 poles connectors
- Use of unshielded cables up to 100 m

Type 2 Safety Light Curtains

MODELS

- **EOS2...A** Automatic Start/Restart
2 x M12 -5 poles connectors
- **EOS2...X** Manual/automatic Start/Restart
Feedback input - EDM
2 x M12 connectors (1x5 poles + 1x8 poles)
- **EOS2...XM** Master Models
Manual/automatic Start/Restart
Feedback input - EDM
2 x M12 connectors (3x5 poles + 1x8 poles)
- **EOS2...XS** Slave Models
2 x M12 -5 poles connectors
(to be connected to Master models)
- **EOS2...XS2** Slave2 Models
2 x M12 -5 poles connectors
(to be connected between Master and Slave models)

SAFETY RELAYS

New Product line

In addition to the existing line of safety modules for light curtains and safety photocells, Reer is adding a NEW range of safety modules for two hand control, e-stops and safety switches.

MOSAIC

**EMERGENCY STOP AND SAFETY GATE
MONITORING RELAY**
**TWO HAND
CONTROL
RELAY**

MOdular SAfety IntEgrated Controller

Modular Safety Controller

MOSAIC is a hub able to manage all the safety function of a machinery or a plant.

Modular Safety Controller

MOSAIC can manage safety sensors and signals such as light curtains, safety photo-eyes, e-stops, safety mats, two-hand controls, magnetic or mechanical switches, encoders, speed control.

Modular Safety Controller

Safety level

- **SIL 3** - IEC 61508
- **SIL CL 3** - EN 62061
- **PL e** - ISO/EN 13849-1
- **Category 4** - ISO/EN 13849-1

Safety level:

Cat. 4

SIL 3 – SILCL 3

PL e – Cat. 4

Modular Safety Controller

MAIN FEATURES

- Compact design:
single module dimensions 22.5 x 99 x 114.5 mm
- Max 14 expansion units in addition to Master M1
- Max 128 inputs and 16 OSSD pairs, 16 feedback restart Interlock inputs and 32 status outputs
- Easy and intuitive graphic configuration software (MSD - Mosaic Safety Designer)
- Communication between units via proprietary high speed bus (MSC - Mosaic Safety Communication)
- Memory card configuration storage (MCM - Mosaic Configuration Memory)
- Simple diagnostics via led signaling and configuration software

Mosaic Safety Designer

Modular Safety Controller

The screenshot displays the Mosaic Safety Designer software interface. The main workspace shows a safety logic diagram with the following components:

- Inputs:** Input 2 (MI2), Input 3 (MI3), Input 4 (MI4), and Input 5 (MI5).
- Logic Elements:** Three sensors (ESPE, FotoCell, FotoCell) connected to inputs 2, 3, and 4 respectively. An AND gate (&) combines the outputs of the two FotoCell sensors. Another AND gate (&) combines the outputs of the ESPE sensor and the first AND gate.
- Control Element:** A Change2 sensor connected to Input 5.
- Output:** An OR gate (≥1) combines the outputs of the second AND gate and the Change2 sensor. This output is connected to an OSSD (Output Safe Stop Device) block, which is then connected to Output 4 (MO4) and Output 5 (MO5).

The left sidebar contains a component palette with categories: Input, Output, OSSD, Signal, ESPE, Two Hand, E-Stop, Mod-Sal, PhotoCell, E-Stop, Enable, Foot-Switch, S-Mat, Operator, and Configurazione. The Configurazione section lists: M1 (Master 8 input - 2 o...), M08 (Espansione 8 Input...), M002 (Espansione 8 Input...), and M116 (Espansione 16 Input...).

The bottom right window, titled "Configurazione", shows a hardware rack configuration with four modules: M1, M16, M16, and M102. Each module is represented by a vertical bar with REER logos and indicator lights. The status bar at the bottom indicates "Reset Zoom" and "79%".

Modular Safety Controller

MOSAIC M1

- Stand alone and Main Unit
- Programmable via USB line.
- 8 digital input
- 2 OSSD (2 pairs)
- 4 test output (for sensors to be monitored)
- 2 digital signaling outputs
- 2 inputs for Restart / EDM
- MCM configuration memory
- 24 connectors x 22.5 mm

FMC-CBL

JANUS

TYPE 4

SAFETY LIGHT CURTAINS

<http://muting.reer.it>

- ***Automatic palletizing / de palletizing systems***
- ***Material handling and storage systems***
- ***Wrapping, Packing and packaging machines***
- ***Assembly lines in automotive industry***
- ***Industrial automatic warehouses***
- ***AGV transit gates***

muting function

- 2 -To permit access of the material and prevent access by persons.
Example of application : Pallet exit to/from the hazardous area.

Protection of a palletizer system

- Detail of JANUS ML 3B protecting the A zone (pallet exit zone with filled cans)

Protection of a de-palletizer system

- JANUS MT 3B protecting the entry zones for pallets with empty cans to be de-palletised and to be draw toward the filling machine

JANUS M

With Muting function

- **MI models**

- 2 – 3 - 4 beams
- 30-40-90 mm resolution
- 16 / 60 meters max. scanning range
- 2 or 4 external sensors can be connected

- **ML and MT models**

- 2 – 3 beams
- pre-assembled, pre-wired, pre-aligned built-in photoelectric muting sensors

Integrated Muting Sensors

ADJUSTMENT OF SENSOR ELEMENTS

The system is equipped with a **VERTICAL** and **ANGULAR** adjustment of the sensor elements.

For normal installations the ML and MT models are pre-aligned and do not require further adjustments. In case of need a scale printed on the side of the light curtain helps to repeat the same adjustment on the 2 side.

Automatically complying with the standard IEC TS 62046 regarding the geometry of muting sensors placement.

JANUS M TRX

With Muting function and passive, retro-reflector elements which need no power supply nor any other wiring

- **MI TRX and MI TRXL models**

- 2 – 3 - 4 beams
- 6 meters max. scanning range
- 2 or 4 external sensors can be connected

- **ML TRX and MT TRX models**

- 2 – 3 beams
- pre-assembled, pre-wired, pre-aligned built-in photoelectric muting sensors

MAIN FEATURES

- **Built-in Muting function**
 - Built-in user selectable manual or automatic restart
 - Built-in feedback input for External Device Monitoring
 - 2 PNP safe static outputs with short circuit protection
 - 1 PNP output to indicate light curtain status
 - Light curtain status, muting sensors and configurations indicator LEDs
 - 7 segments Display for auto-diagnostics of malfunctioning or faults
 - User selectable maximum Muting time-out function
- **Built-in Override function, with 2 different selectable modes:**
 - manual with hold to run action
 - automatic with impulse command
- *Special EX models intended for use in potentially explosive atmosphere complying the 94/9/EEC "ATEX Directive" – Dust Zone 22 – Gas Zone 2*

JANUS MT TRX

WITH PASSIVE RETRO-REFLECTOR ELEMENTS

- **Wiring on one side only**
- **Built-in pre-wired and pre-aligned Start / End optical Muting sensors (integrated in the horizontal Sensor Elements)**
- 2 – 3 beams for body detection
- **4 parallel muting beams (polarized reflex photocells)**
- Suitable for a reliable detection of transparent objects (i.e. glass, plastic, etc.)
- **1 PNP static output for Muting status** **New**
- **1 Muting enable input** **New**

Muting enable input allows the start of a muting sequence only when needed by the machine cycle, ex.: muting enabled only if the conveyor is moving. That means more safety.

JANUS MT TRX

WITH PASSIVE RETRO-REFLECTOR ELEMENTS

JANUS

J

TYPE 4

SAFETY LIGHT CURTAINS

without muting

Janus J series light curtains have the same dimensional and electric features and the same connectors of the Janus M series, but they do not have the Muting function.

Janus J series offers:

- **J LR series**, Long Range light curtains with a maximum scanning range of **60 meters**, having models with **2, 3, 4 beams** or **40 mm resolution**
- **J TRX and J TRXL** models with 2-3-4 beams and **passive retro-reflector** system
- **J 2, 3, 4 beams** models with a maximum scanning range of 16 meters, the ideal solution to put together with the M series in manual in-feed areas of palletizer, materials handling and storage system applications.
- Special models complying the 94/9/EEC "ATEX Directive" - Dust Zone 22 available

JANUS SL / S2L

Integrated muting sensors for Janus MI

Additional arms with integrated photoelectric muting sensors pre connected and pre aligned to be used with any Janus Mi model.

They permit to realize a L shape barrier with:

- **Resolution 30, 40, 90 mm**
- **Protected height from 310 to 1810 mm**

2 different models:

- **SL 2 crossed beams**
- **S2L 2 parallel beams**

THE REASONS OF A SUCCESS

Quick installation

Thanks to:

- Integration of all necessary functions like Muting, fail-safe static outputs, user-selectable automatic or manual restart, feedback input for External Devices Monitoring, diagnostics LEDs clearly indicating any possible error of use or internal fault, two modes override.
- Built-in pre-wired and pre-aligned Start / End optical Muting sensors integrated in the horizontal Sensor Elements.
- Dedicated accessories, such as pre-wired cables, interconnection boxes MXJB, complete of restart and override commands, Muting lamp and integrated relays, which allow a simple, rapid and safe interface with the controlled machine.

Reduced installation time and costs.

THE REASONS OF A SUCCESS

Safety and Responsibility

With the ML / ML TRX and MT / MT TRX models compliance with the regulatory requirements -IEC TS 62046- regarding the geometry of the muting sensors and all the other safety parameters is automatically guaranteed.

- *Ideal for object recognition, quality control, detection of dimensional limits.*

- **METRON B**

- **RS-485 serial line + two solid state outputs 0/24V with programmable functions**

Solution providing complete and detailed information on the status of each beam via the RS 485 serial line and, by means of the two solid state

outputs, further on/off information related to the occurrence of the programmed conditions.

- *Ideal for dimensional measurement, detection of object profile and position.*

- **METRON C**

- **Two solid state antivalent outputs 0/24V without the need for programming**

Solution providing simple on/off information related to the status of the controlled area.

- *Ideal for piece counting and detection of object presence/absence in the controlled field.*

METRON

light curtains for measurement automation and control

- Controlled height from 140 mm to 2525 mm
- Beam spacing 5 – 10 – 25 – 30 – 50 – 75 mm
- Max Scanning range
 - 2 meters 5 mm beam spacing models
 - 6 meters 25 – 50 – 75 mm beam spacing models
 - 16 meters 10 – 30 mm beam spacing models
- Possibility for on-line display on PC screen during operation (via RS 232)
- Status of each individual beam and solid state outputs
- Metron A and B programming via Metronconf configuration software

Two-dimensional detection of objects in transit on conveyor systems with use of 2 light curtains

Automatic warehouses: detection of maximum height of the objects present in the boxes for efficient management of the machine's capacity

Automatic warehouses: detection of maximum height of the objects present in the boxes for efficient management of the machine's capacity
You can see the light beams slots

Detection of position and profile of pieces in automatic painting systems

Robotized painting plants

Repeater painting Robot

The information about dimension, position and profile of the material to be painted is sent to the Robot control. The robot is driven in way to spray when and where is necessary. The curtain is placed vertically at painting job cabin entry.

Measurement of length / dimensions / position of panels or plate on conveyor belts

Measurement of dimensional shape limit for vehicles to be handled in automating parking systems

Automatic parking systems

Internal view. It is necessary to detect the maximum dimension keeping into account any external accessory (baggage-rack, aerial ...)

Same necessity in automatic CAR WASH
